

SkillPath AI: Product Requirements Document & Project Milestone Plan

PART 1: PRODUCT REQUIREMENTS DOCUMENT (PRD)

1. Executive Summary

SkillPath AI is an intelligent career development platform specifically designed for the Egyptian job market, addressing the critical skills mismatch crisis affecting over 60% of employers and contributing to a 7.2% unemployment rate. By leveraging advanced artificial intelligence, real-time market analytics, and culturally-aware personalization, SkillPath AI creates hyper-personalized career pathways that bridge the gap between individual capabilities and market demands.

Value Proposition: Unlike generic global platforms, SkillPath AI provides localized, data-driven career guidance that understands Egyptian market dynamics, Arabic language nuances, and regional business culture, delivering 40% improvement in job placement rates and 25% reduction in sectoral skills gaps.

Vision: To become the leading AI-powered career development ecosystem in the MENA region, empowering millions of professionals to achieve their career aspirations while supporting Egypt's digital transformation goals under Vision 2030.

2. Problem Statement

Market Challenges

- Skills Mismatch Crisis:** 60% of Egyptian employers struggle to find qualified candidates despite 7.2% unemployment
- Inadequate Career Guidance:** 850,000+ annual university graduates lack access to personalized career development tools
- Generic Global Solutions:** International platforms (LinkedIn Learning, Coursera) fail to address:
 - Egyptian Arabic dialect requirements
 - Local salary structures and expectations
 - Sector-specific cultural nuances
 - Regional certification requirements
 - Government employment frameworks

User Pain Points

- Job Seekers:** Unclear career paths, outdated skills, lack of market intelligence
- Professionals:** Limited advancement opportunities, skills obsolescence, salary stagnation
- Employers:** Talent acquisition challenges, high training costs, retention issues
- Educational Institutions:** Curriculum-industry gap, graduate employment tracking

3. Solution Overview

SkillPath AI delivers an integrated career development ecosystem through:

Core Solution Components

- AI-Powered Career Intelligence:** Real-time analysis of Egyptian job market trends, skills demand, and salary benchmarks
- Personalized Learning Pathways:** Dynamic, adaptive curricula tailored to individual goals and market requirements
- Skills Assessment & Gap Analysis:** Comprehensive evaluation combining technical testing, soft skills analysis, and psychometric profiling
- Arabic Language Processing:** Custom NLP models trained on Egyptian Arabic for accurate communication and content localization
- Corporate Integration Network:** Direct partnerships with Egyptian companies for placements, internships, and projects
- Gamified Engagement System:** Achievement-based progression, peer competitions, and social learning features

Unique Differentiators

- First MENA-specific AI career platform with Egyptian market focus
- Bilingual support (Arabic/English) with dialect awareness
- Government alignment with Egypt Vision 2030 objectives
- Industry-validated certification programs
- Real-time market intelligence from local job platforms

4. Key Objectives & KPIs

Primary Objectives

- User Acquisition:** Capture 10% of annual graduate market within Year 1
- Market Impact:** Reduce skills gap in priority sectors by 25% within 2 years
- Revenue Growth:** Achieve EGP 50 million ARR by Year 3
- Platform Adoption:** Secure partnerships with 100+ Egyptian companies

Key Performance Indicators

Category	KPI	Target	Measurement Period
User Engagement	Monthly Active Users (MAU)	100,000	Year 1
	User Retention Rate	80%	Monthly
	Daily Active Users (DAU/MAU)	40%	Monthly
Learning Effectiveness	Skill Improvement Rate	90%	Per Assessment
	Course Completion Rate	75%	Quarterly
	Certification Pass Rate	85%	Per Program
Business Impact	Job Placement Rate	70%	12 Months
	Salary Increase (Average)	30%	Post-Placement
	Time to Employment	<6 months	Per User
Revenue Metrics	Customer Acquisition Cost	<EGP 500	Monthly
	Customer Lifetime Value	>EGP 5,000	Annual
	Monthly Recurring Revenue	EGP 4M+	Year 3

5. Target Users & Personas

Primary User Segments

Persona 1: Fresh Graduate "Ahmed"

- Age: 22-26 years
- Education: Bachelor's degree (Engineering, Commerce, Arts)
- Pain Points: Lack of practical skills, unclear career direction, limited network
- Goals: Secure first job, understand market requirements, build professional skills
- Platform Usage: Daily learning, job matching, skill assessments

Persona 2: Career Switcher "Mariam"

- Age: 27-35 years
- Experience: 3-7 years in unrelated field
- Pain Points: Skill obsolescence, industry transition challenges, certification needs
- Goals: Transition to tech/digital roles, upskill efficiently, maintain income
- Platform Usage: Evening learning, weekend projects, certification programs

Persona 3: Corporate Professional "Hassan"

- Age: 30-45 years
- Position: Mid-level management
- Pain Points: Career plateau, leadership skill gaps, limited growth opportunities
- Goals: Executive advancement, salary negotiation, industry recognition
- Platform Usage: Executive courses, networking events, mentorship programs

Secondary Segments

- HR Managers:** Seeking talent pipeline and employee development solutions
- University Career Centers:** Requiring placement support and graduate tracking
- Government Agencies:** Implementing national skills development initiatives

6. Core Features & Functional Requirements

6.1 Intelligent Career Assessment Module

Functional Requirements:

- Multi-dimensional skills evaluation (technical, soft skills, psychometric)
- AI-powered CV parsing with computer vision
- Behavioral assessment through gamified challenges
- Arabic/English language proficiency testing
- Industry-specific competency mapping
- Technical Specs:** TensorFlow models, OpenCV integration, REST API endpoints

6.2 Market Intelligence Engine

Functional Requirements:

- Real-time job market data aggregation from Wuzzuf, Forasna, Bayt
- Salary benchmarking and trend analysis
- Skills demand forecasting using predictive analytics
- Company culture and work environment scoring
- Industry growth projections and opportunity mapping
- Technical Specs:** Web scraping (Scrapy), NLP pipeline (spaCy), Kafka streaming

6.3 Personalized Learning Path Generator

Functional Requirements:

- Dynamic curriculum generation based on goals and gaps
- Adaptive learning algorithms adjusting to progress
- Multi-modal content curation (video, text, interactive)
- Project-based learning with real-world applications
- Peer collaboration and group learning features
- Technical Specs:** Reinforcement learning (PyTorch), recommendation engine (collaborative filtering)

6.4 Arabic Language Processing System

Functional Requirements:

- Egyptian Arabic dialect understanding and generation
- Bilingual content translation and localization
- Voice-based career counseling in Arabic
- Resume writing assistance in Arabic/English
- Interview preparation with dialect-aware feedback
- **Technical Specs:** Custom BERT models, Whisper API, Arabic corpus training

6.5 Corporate Partnership Portal

Functional Requirements:

- Company profile and culture showcase
- Direct job posting and application pipeline
- Internship and project opportunity matching
- Employee referral system
- Bulk corporate training subscriptions
- Performance analytics dashboard
- **Technical Specs:** B2B API gateway, SSO integration, analytics dashboard (Metabase)

6.6 Gamification & Engagement System

Functional Requirements:

- Achievement badges and skill certificates
- Learning streaks and progress tracking
- Peer competitions and leaderboards
- Social learning communities
- Mentorship matching algorithm
- Virtual career fairs and networking events
- **Technical Specs:** Redis for real-time scoring, WebSocket for live features

7. System Architecture Overview

High-Level Architecture

Data Flow Architecture

- 1. Data Ingestion:** Web scrapers → Kafka → Processing pipeline
- 2. User Interaction:** Frontend → API Gateway → Microservices → Database
- 3. AI Processing:** User data → ML models → Predictions → Personalization engine
- 4. Analytics Pipeline:** Events → Kafka → Spark → Data warehouse → BI tools

8. Technical Stack

Frontend Technologies

- Web Application:** React.js 18+, TypeScript, Tailwind CSS
- Mobile Applications:** React Native, Expo
- State Management:** Redux Toolkit, React Query
- UI Components:** Material-UI, Ant Design
- Charting:** D3.js, Recharts
- Internationalization:** i18next (Arabic/English)

Backend Technologies

- API Framework:** Django REST Framework, FastAPI
- Microservices:** Python 3.10+, Node.js (specific services)
- Message Queue:** Apache Kafka, RabbitMQ
- Caching:** Redis, Memcached
- Search:** Elasticsearch

- **Task Queue:** Celery

AI/ML Stack

- **Deep Learning:** TensorFlow 2.x, PyTorch
- **NLP:** Hugging Face Transformers, spaCy, NLTK
- **Computer Vision:** OpenCV, Tesseract OCR
- **Classical ML:** scikit-learn, XGBoost
- **Arabic NLP:** CAMEL Tools, AraBERT, custom models

Data Infrastructure

- **Primary Database:** PostgreSQL 14+
- **Document Store:** MongoDB
- **Time Series:** InfluxDB
- **Data Warehouse:** Apache Spark, Delta Lake
- **ETL Pipeline:** Apache Airflow

Cloud & DevOps

- **Cloud Provider:** AWS (primary), Azure (backup)
- **Container Orchestration:** Kubernetes, Docker
- **CI/CD:** GitLab CI, GitHub Actions
- **Monitoring:** Prometheus, Grafana, ELK Stack
- **Security:** OAuth 2.0, JWT, SSL/TLS

9. User Journey / Experience Flow

Journey 1: Fresh Graduate Onboarding & Job Placement

1. DISCOVERY
 - ↳ Social media ad / University referral
2. REGISTRATION
 - ↳ Email/phone signup → Profile creation (Arabic/English)
3. INITIAL ASSESSMENT
 - ↳ Upload CV → Skills test → Personality assessment
4. GAP ANALYSIS
 - ↳ AI analyzes skills vs. market demand → Personalized report
5. LEARNING PATH
 - ↳ Custom curriculum generated → Course enrollment
6. SKILL DEVELOPMENT
 - ↳ Daily learning → Projects → Peer collaboration
7. CERTIFICATION
 - ↳ Assessment → Industry certification → Badge earning
8. JOB MATCHING
 - ↳ AI recommends positions → Application assistance
9. INTERVIEW PREP
 - ↳ Mock interviews → Feedback → Company research
10. PLACEMENT
 - ↳ Job offer → Salary negotiation support → Success tracking

Journey 2: Corporate Training Program

1. CORPORATE INQUIRY
 - ↳ B2B portal → Demo request
2. NEEDS ASSESSMENT
 - ↳ Skills audit → Team evaluation → Training plan
3. CUSTOM PROGRAM
 - ↳ Tailored curriculum → Bulk enrollment
4. EMPLOYEE ONBOARDING
 - ↳ SSO integration → Individual assessments
5. TEAM LEARNING
 - ↳ Group projects → Progress tracking → Leaderboards
6. PERFORMANCE ANALYTICS
 - ↳ ROI dashboard → Skill improvement metrics
7. CERTIFICATION
 - ↳ Company-branded certificates → LinkedIn integration

10. Business & Monetization Model

Revenue Streams

1. Individual Subscriptions (B2C)

- **Basic Plan:** EGP 299/month - Core features, limited assessments
- **Professional Plan:** EGP 599/month - Full features, unlimited learning
- **Premium Plan:** EGP 999/month - 1-on-1 mentoring, priority placement

2. Corporate Solutions (B2B)

- **Team Plan:** EGP 500/employee/year (10-50 employees)
- **Enterprise Plan:** EGP 1,000/employee/year (50-500 employees)
- **Custom Solutions:** EGP 2,000+/employee/year (500+ employees)

3. Certification Programs

- **Technical Certifications:** EGP 1,000-3,000 per certificate
- **Professional Certifications:** EGP 2,000-5,000 per certificate
- **Executive Programs:** EGP 5,000-10,000 per program

4. Placement Services

- **Success Fee:** 5-10% of first-year salary for successful placements
- **Recruitment Partnership:** EGP 5,000-15,000 per hire

5. Government Contracts

- **National Skills Initiative:** Multi-million EGP contracts
- **University Partnerships:** Annual licensing fees

Financial Projections

Year	Users	ARR (EGP)	Gross Margin	EBITDA
Year 1	50,000	8M	60%	-2M
Year 2	150,000	25M	70%	5M
Year 3	300,000	50M	75%	15M

11. Risks, Constraints, and Assumptions

Risks

1. Market Risks
 - Competition from international platforms entering Egypt
 - Economic downturn affecting subscription willingness
 - Slow corporate adoption of digital learning
2. Technical Risks
 - Arabic NLP model accuracy and maintenance
 - Scalability challenges with user growth
 - Data privacy and security concerns
3. Operational Risks
 - Talent acquisition for specialized AI roles
 - Content quality and localization challenges
 - Partnership dependency for job placements

Constraints

- **Budget:** Initial funding of EGP 5-10 million required
- **Timeline:** 18-month development cycle for MVP
- **Resources:** Team of 6 with varying proficiency levels
- **Regulatory:** Compliance with Egyptian data protection laws
- **Technical:** Arabic language processing complexity

Assumptions

- Continued growth in Egyptian digital economy
- Government support for digital skills initiatives
- Increasing internet penetration and smartphone adoption
- Corporate willingness to invest in employee development
- User acceptance of AI-driven career guidance

12. Milestones & Expected Outcomes

Development Milestones

Phase 1: Foundation (Months 1-6)

- Market research and validation
- Technical architecture design
- Core platform development
- MVP with basic features

Phase 2: Enhancement (Months 7-12)

- AI model training and optimization
- Arabic NLP integration
- Beta testing with 1,000 users
- Corporate partnership development

Phase 3: Launch (Months 13-18)

- Public platform launch
- Marketing campaign initiation
- First 10,000 users onboarded
- Revenue generation begins

Phase 4: Scale (Months 19-24)

- 50,000+ active users
- 50+ corporate partnerships
- Regional expansion planning
- Series A funding preparation

Expected Outcomes

Short-term (6 months)

- Functional MVP with core features
- 1,000 beta users providing feedback
- 5 corporate partnership MOUs
- Initial revenue validation

Medium-term (12 months)

- 40% job placement improvement for users
- 10,000+ monthly active users
- EGP 2M+ in annual recurring revenue
- Government partnership secured

Long-term (24 months)

- Market leader in Egyptian career development
- 100,000+ users impacted
- 25% skills gap reduction in target sectors
- Regional expansion initiated

13. Alignment with Egypt Vision 2030

Digital Transformation Goals

- **Skills Development:** Directly supports national agenda for digital literacy
- **Employment:** Addresses unemployment through targeted upskilling
- **Economic Growth:** Contributes to knowledge economy development
- **Innovation:** Pioneers AI applications in Egyptian context

Specific Contributions

1. **Human Capital Development**
 - Training 300,000+ professionals by 2030
 - Reducing youth unemployment by 2-3%
 - Increasing digital sector employment by 15%
2. **Education Reform Support**
 - Bridging university-industry gap

3. Economic Impact	◦ Modernizing career counseling services
	◦ Promoting lifelong learning culture
	◦ Creating 500+ direct jobs
4. Social Inclusion	◦ Enabling 10,000+ indirect employment opportunities
	◦ Contributing EGP 200M+ to GDP by 2030
	◦ Providing equal opportunities regardless of background
5. Digital Transformation	◦ Supporting women's workforce participation
	◦ Enabling remote work capabilities
	◦ Establishing digital literacy programs

PART 2: TEAM ROLE ASSIGNMENTS & MILESTONE PLANNING

Team Composition & Role Assignments

Based on proficiency levels and project requirements, the following role assignments optimize team capabilities:

Team Member	Proficiency	Role Assignment	Core Responsibilities
Mahmoud	5 (Expert)	Technical Lead & Backend Architect	System architecture, API design, microservices implementation, code reviews, technical mentoring
3wes	5 (Expert)	AI/ML Lead & Data Science Engineer	ML model development, NLP pipeline, recommendation algorithms, data processing architecture
Omar	4 (Advanced)	Full-Stack Developer & DevOps Engineer	Frontend development, backend integration, CI/CD pipeline, cloud infrastructure setup
Yasser	2 (Intermediate)	Frontend Developer & UI Implementation	React components, user interface implementation, responsive design, API integration
Hassan	2 (Intermediate)	QA Engineer & Documentation Lead	Testing strategies, test automation, technical documentation, user guides
Ghazali	1 (Junior)	Junior Developer & Research Assistant	Market research, data collection, basic feature implementation, testing support

Detailed Milestone Breakdown by Role

PHASE 1: FOUNDATION (Weeks 1-12)

Role	Milestone	Timeline	Deliverables
Mahmoud (Technical Lead)	System Architecture Design	Weeks 1-3	• Technical architecture document • Database schema • API specifications
3wes (AI/ML Lead)	AI/ML Pipeline Foundation	Weeks 2-4	• ML model selection document • Data pipeline architecture • NLP framework
Omar (Full-Stack Dev)	Development Environment Setup	Weeks 2-3	• Docker containers • CI/CD pipeline • Cloud infrastructure • DevOps toolchain
Yasser (Frontend Dev)	UI/UX Mockups & Prototypes	Weeks 1-4	• Figma designs • Component library setup • Design system documentation
Hassan (QA/Documentation)	Testing Strategy & Documentation Framework	Weeks 3-4	• QA plan • Test case templates • Documentation structure
Ghazali (Junior Dev)	Market Research & Competitive Analysis	Weeks 1-3	• Market analysis report • Competitor feature matrix • User survey results

PHASE 2: CORE DEVELOPMENT (Weeks 13-36)

Role	Milestone	Timeline	Deliverables
Mahmoud	Backend Services Implementation	Weeks 13-24	• User authentication service • Core API endpoints • Database integration • Microservices architecture
3wes	ML Models Development	Weeks 13-28	• Skills assessment model • Recommendation engine • Arabic NLP model (v1) • Career prediction model
Omar	Frontend-Backend Integration	Weeks 20-30	• API integration layer • State management • Real-time features • Mobile app foundation
Yasser	User Interface Implementation	Weeks 16-32	• Landing pages • Dashboard components • Learning interface • Responsive design
Hassan	Testing & Quality Assurance	Weeks 20-36	• Unit test coverage (80%) • Integration tests • Performance testing • Bug tracking system
Ghazali	Content Creation & Data Entry	Weeks 13-36	• Course content drafts • Test data sets • User documentation • FAQ compilation

PHASE 3: INTEGRATION & OPTIMIZATION (Weeks 37-48)

Role	Milestone	Timeline	Deliverables
Mahmoud	System Integration & Optimization	Weeks 37-42	• Service orchestration • Performance optimization • Security hardening • Load balancing
3wes	AI Model Optimization	Weeks 37-44	• Model fine-tuning • Arabic NLP improvements • A/B testing framework • Personalization engine
Omar	DevOps & Deployment	Weeks 40-45	• Production environment • Auto-scaling setup • Monitoring dashboards • Backup strategies
Yasser	UI Polish & Mobile App	Weeks 37-46	• UI refinements • Animation implementation • Mobile app completion • Accessibility features
Hassan	Comprehensive Testing	Weeks 37-48	• End-to-end testing • Security testing • Performance benchmarks • User acceptance testing
Ghazali	Beta User Support	Weeks 40-48	• User onboarding materials • Support ticket handling • Feedback compilation • Tutorial videos

PHASE 4: LAUNCH PREPARATION (Weeks 49-52)

Role	Milestone	Timeline	Deliverables	Dependencies
Mahmoud	Production Deployment	Week 49-50	• Production release • Rollback procedures • Technical support plan	All testing completed
3wes	ML Model Deployment	Week 49-50	• Production model deployment • Model monitoring setup • Fallback mechanisms	Models optimized
Omar	Launch Infrastructure	Week 49-51	• CDN configuration • Database optimization • Scaling policies • Disaster recovery	Load testing complete
Yasser	Final UI Touches	Week 49-50	• Launch landing page • Onboarding flow • Marketing materials	Polish completed
Hassan	Launch Documentation	Week 49-52	• User guides • API documentation • Admin manual • Training materials	All features finalized
Ghazali	Launch Support Preparation	Week 50-52	• FAQ updates • Support scripts • Community setup • Feedback channels	Documentation ready

Collaboration Matrix

Cross-functional Dependencies

Phase	Primary Collaboration Points			Critical Path
Foundation	Mahmoud ↔ 3wes: Architecture alignment Omar ↔ Yasser: Frontend setup Hassan ↔ All: Documentation standards	Architecture doc → All team tasks		Documentation
Development	Mahmoud ↔ Omar: API contracts 3wes ↔ Mahmoud: Model integration Yasser ↔ Omar: Component development	API specs → Frontend team Backend team		Integration
Integration	All hands: System integration Hassan ↔ All: Testing coordination Ghazali ↔ Hassan: User feedback loop	Integrated system → Testing		Deployment
Launch	Mahmoud ↔ Omar: Deployment coordination Hassan ↔ Ghazali: Support preparation All: Launch readiness	Final build → Production Support team		Post-launch

Risk Mitigation by Role

Risk Category	Mitigation Owner	Mitigation Strategy
Technical Complexity	Mahmoud	Weekly architecture reviews, pair programming sessions
AI Model Performance	3wes	Incremental model development, fallback algorithms
Timeline Slippage	Omar	Agile sprints, continuous integration, feature flags
Quality Issues	Hassan	Automated testing, continuous monitoring, regression suites
Knowledge Gaps	Mahmoud & 3wes	Mentorship program, technical workshops, documentation
User Adoption	Ghazali & Yasser	User feedback loops, iterative improvements, A/B testing

Training & Development Plan

Team Member	Skill Development Focus	Training Resources	Timeline
Yasser	React advanced patterns, TypeScript	Udemy courses, pair programming with Omar	Weeks 1–12
Hassan	Test automation, Python basics	Pytest documentation, QA workshops	Weeks 1–8
Ghazali	Python fundamentals, Git workflow	Codecademy, mentorship from Mahmoud	Weeks 1–16

Success Metrics by Role

Role	Key Performance Indicators	Target
Mahmoud	System uptime, Code review turnaround, Technical debt ratio	99.9%, <24hrs, <15%
3wes	Model accuracy, Training time reduction, Feature deployment rate	>85%, 50% improvement, 2 features/month
Omar	Build success rate, Deployment frequency, Performance metrics	>95%, Daily, <2s load time
Yasser	UI implementation speed, Bug rate, User satisfaction	5 screens/week, <5 bugs/screen, >4.5/5
Hassan	Test coverage, Bug detection rate, Documentation completeness	>80%, >90%, 100%
Ghazali	Task completion rate, Learning progress, Support ticket resolution	>90%, 1 skill/month, <24hr response

Communication & Reporting Structure

Daily Standups: 15-minute sync (all team members) **Weekly Technical Review:** Led by Mahmoud and 3wes **Bi-weekly Sprint Planning:** Full team participation **Monthly Stakeholder Updates:** Prepared by Hassan, presented by Mahmoud **Quarterly Retrospectives:** Facilitated by Omar

Conclusion

This comprehensive PRD and milestone plan provides a robust framework for developing SkillPath AI. The document establishes clear technical requirements, business objectives, and team responsibilities while maintaining alignment with Egypt's Vision 2030 goals. The role-based milestone breakdown ensures optimal utilization of team members' varying proficiency levels while providing growth opportunities for junior members.

The success of SkillPath AI depends on disciplined execution of this plan, continuous market validation, and adaptive response to user feedback. With proper implementation, the platform will revolutionize career development in Egypt and serve as a model for the broader MENA region.
